Mr. Saulsbury, from the Committee on Privileges and Elections, reported a resolution authorizing that committee to investigate the memorials in the logalls contested election case. I: was placed on the calendar.

Mr. Wallace rose to a privileged question, and presented the report of the Conference Committee on the Judicial Expenses bill and asked its present consideration.

Mr. Coukling said he did not know how far the committee had conflued themselves to adjusting the disagreeing votes and objected to considering the report in view of the under standing on the Army bill. If another missuaderstanding arose by reason of crowding out debate, the republicans would not be to blame: After an animated discussion, Mr. Wallace withdrew the report and Mr. Carpenter proceeded to speak on the Army bill.

Mr. Carpenter said the army in time of peace was a police force, and any use of it was a use as a police force. The intent of the bill was plainly to prevent any use of troops whatever on election day and it forbade the President to respond to the call of a State for aid.

Harvesting has begun, or is about to begin, in the section of country tributary to Alexandria, and, as a consequence, the farmers have ceased shipping, and the receipts of produce are very light, much of the grain-especially Corncoming from the West. It is gratifying to know that the prespect for a large yield of Wheat is good, and that the quality of the grain generally is excellent. The opening price will be about \$1 25, and it would not be amiss, we think, for farmers to ship early, if those figures are maintained, if the reports of the yield throughout the country are to be relied upon. However, it is a speculation in the end; but, all things taken into consideration, those who ship early generally do about as well as those who sell later. Business during the week has been only moderately active, and financially there has been nothing worthy of special note in this city. The farmers have been drawing freely for harvest purposes, and this has caused a little more enquiry for currency, but otherwise there is a light demand in commercial circles, and good paper is readily taken by the banks, whose recent statements make a very satisfactory showing. In Baltimore the supply of money is ample for the demand, but the market is less heavy than it was a week or two sgo, and the banks have less difficulty in employing their funds at current rates. The quotations are 4:5 per cent for loans, and 41:0 for discounts, the inside figures only where the most undoubted security is offered. In the Philadelphia market money is abundant and easy at 3,4 per cent on call, and 42a52 for discounts.
